

The surface of bare concrete is very susceptible to damage from everyday use. Spills will cause stains and dropping items can cause chips and cracks. It is also slippery, particularly when wet, and will be dusty for life.

BabcoGarage has a variety of epoxy floor coatings that will not only protect and seal the surface, but also improve the safety of users. Our floor coatings include a variety of looks...textured flakes or quartz, plain and metallic and a large assortment of colours to create the look and meet the specific needs of the user.

Users, facility managers and owners of commercial and industrial spaces have very specific demands of their flooring and we offer tailored solutions with fast turnaround, low maintenance and customizable colors and finishes.

Warehouses, car dealerships, aircraft hangars and manufacturing industries need fast return to service, high up-time and safe, non-slip surfaces. They also need easy maintenance, resistance to chemicals and long-term durability.

Other facilities such as food and beverage, grow rooms, healthcare, breweries, veterinary clinics and dog kennels may have regulated requirements for cleaning and our solutions include very easy to clean and maintain floors and we offer antimicrobial technology to inhibit the growth of bacteria. Additionally, the floors are anti-slip and long-term durable.

Education facilities and event flooring such as stadiums present their own challenges as they are subject to heavy foot traffic and daily cleaning. Additionally, they need to be anti-slip and extremely durable.

FEATURES & BENEFITS

- Fast cure flooring systems and fast return to service
- Exceptional thermal shock resistance
- Excellent chemical resistance
- Exceptional impact and abrasion resistance
- Very low VOC and low odor at installation
- Customizable colours and textures
- Easy maintenance and long-lasting flooring
- Coatings equipped with silver ion antimicrobial technology
