

BabcoGarage are the experts in transforming your unfinished concrete garage floor into the envy of the neighbourhood. Our professional installation team will prepare the surface and apply our premium BG polyaspartic floor coating. In most cases, this transformation happens in one day.

Gone is the dust and unsightly cracks and stains. Now you have a protected, easy to clean and beautiful looking floor. Time to invite those friends and neighbours over!

ADVANTAGES OF OUR POLYASPARTIC FLOORING

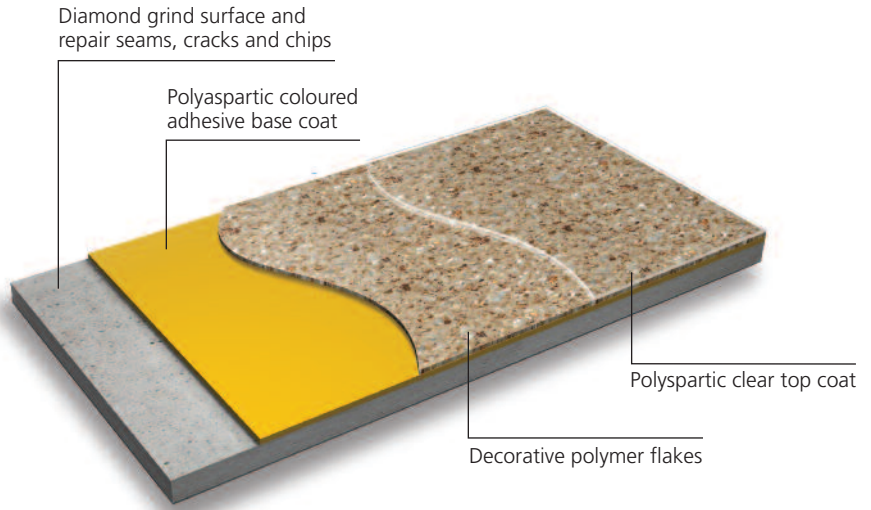

- Chemical resistance to oil, gas, coolant, salt and household chemicals
- UV stable (doesn't yellow or fade over time) and maintains a glossy finish
- Waterproof, durable and maintenance free
- Excellent resistance to abrasion and impact
- Textured surface provides more traction
- High heat tolerance compared with epoxy coatings to resist "hot tire pickup" (permanent tire marks)
- 1-day installation for standard garages
- Short return to service times / 12 hours foot traffic / 24-96 hours vehicle
- Decorative and available in wide range of colours and textures to match any decor
- Formulated for Canada with application year round / cures from -30°C to 40°C

FLOOR PREPARATION & COATING APPLICATION PROCESS

Floor preparation is where the critical time-consuming work is done to yield a beautiful, long-lasting floor. Your BabcoGarage team will diamond grind the entire surface. Vertical surfaces such as foundation walls and wooden steps will be prepared with hand grinders. Hairline cracks and other minor damage is then repaired.

As one BabcoGarage crew member applies the base coat, another will start broadcasting the polymer flakes on top. To ensure complete coverage we will broadcast three times the amount needed. After allowing about an hour to cure, our team will scrape off all the excess flakes. They will then take the blower to round up any random flakes and finally give the surface a good vacuuming.

The clear top coat is now squeegeed on and then rolled. This final coat creates a beautiful luster and your floor transformation is complete. You just need to wait about 12 hours before walking on your beautiful floor and about 48-96 hours before you drive on it. Congratulations!

STANDARD COLOURS

(please visit our showroom for actual samples as colours may vary / custom colours available)
